

PRESS RELEASE

ENCAVIS acquires wind farms from ENERTRAG in Bonnhagen and Roitzsch

Hamburg/Dauerthal, 20 December 2024 – SDAX-listed wind and solar park operator Encavis AG (Prime Standard, ISIN: DE0006095003, stock exchange symbol: ECV) has acquired two wind parks under construction in Bonnhagen (Mecklenburg-Western Pomerania) and Roitzsch (Saxony-Anhalt) from ENERTRAG SE, which is also responsible for their construction and operation.

The Bonnhagen wind park (24 MW) is located 30 kilometres west of Wismar and has been under construction since July 2024. Grid connection is planned for September 2025. The Roitzsch wind farm (12 MW) is located 40 kilometres northwest of Leipzig and has been under construction since April 2024. Here, connection to the grid is expected as early as March 2025. The purchase of electricity from both wind farms is secured by an EEG feed-in tariff with a term of 20 years.

'Following the recent acquisition of the wind parks Dannhausen (Sowitec) and Everswinkel (UKA), the wind parks Bonnhagen and Roitzsch are now being added. Our wind park portfolio in Germany is continuously growing and now totals around 364 MW,' says Mario Schirru, CIO/COO of Encavis AG.

Dr Gunar Hering, CEO of ENERTRAG, says: 'In Encavis, we have found an experienced partner for the Bonnhagen and Roitzsch wind projects that shares our vision of a sustainable and secure energy supply. Encavis' long-term orientation and operational experience perfectly complement ENERTRAG's values and goals, enabling us to jointly advance the energy transition.'

In Bonnhagen, the four Vestas V162 wind turbines each have a generation capacity of 6 MW, which will generate a total of around 77 gigawatt hours (GWh) of electricity per year once completed.

Two Vestas V150 wind turbines, each with a 6 MW generating capacity, will be used in Roitzsch. Once completed, the wind farm will supply a total of around 34 gigawatt hours (GWh) of electricity annually.

About ENERTRAG

At ENERTRAG, we have been advancing the energy transition for over 25 years. Our more than 1,000 employees design, build and operate integrated power plants. These are based on combinations of wind turbines, solar installations, our own grid infrastructure, batteries and electrolyzers. These technologies provide reliable, on-demand electricity, heat and green hydrogen – completely replacing fossil fuel power plants.

With our own plants, we generate around 2,000 gigawatt hours of electricity from the wind and sun every year and have been producing green hydrogen since 2011. Based on this, we are developing energy projects with a capacity of over 30 gigawatts in nine countries on four continents.

ENERTRAG embodies the global energy supply of the future: sustainable, secure and regionally anchored – protecting our planet for current and future generations.

About ENCAVIS:

The Encavis AG (ISIN: DE0006095003; ticker symbol: ECV) is a producer of electricity from Renewable Energies listed on the SDAX of Deutsche Börse AG. As one of the leading independent power producers (IPP), ENCAVIS acquires and operates (onshore) wind farms and solar parks in twelve European countries. The plants for sustainable energy production generate stable yields through guaranteed feed-in tariffs (FIT) or long-term power purchase agreements (PPA). The Encavis Group's total generation capacity currently adds up to around 3.7 gigawatts (GW), of which around 2.4 GW belong to the Encavis AG, which corresponds to a total saving of around 0.8 million tonnes of CO₂ per year stand-alone for the Encavis AG. In addition, the Group currently has more than 1.3 GW of capacity under construction, of which around 900 MW are own assets.

Within the Encavis Group, Encavis Asset Management AG offers fund services to institutional investors. Another Group member company is Stern Energy S.p.A., based in Parma, Italy, a specialised provider of technical services for the installation, operation, maintenance, revamping and repowering of photovoltaic systems across Europe.

ENCAVIS is a signatory of the UN Global Compact as well as of the UN PRI network. Encavis AG's environmental, social and governance performance has been awarded by two of the world's leading ESG rating agencies. MSCI ESG Ratings awarded the corporate ESG performance with their "AA" level and ISS ESG with their "Prime" label (A-), the Carbon Disclosure Project (CDP) with its Climate Score "B" and Sustainalytics with its "low risk" ESG risk rating.
